

TRAN DUONG GIA BAO

BACKEND / FULLSTACK DEVELOPER INTERN

PROFILE

Third-year Information Technology student at HUIT, majoring in Applied Computing, GPA 3,74/4.0. Focused on Backend / Fullstack Development with C#, .NET, ASP.NET Core Web API, SQL Server, HTML/CSS, Bootstrap. Experienced in building practical projects involving RESTful APIs, database design, authentication, payment integration, e-commerce workflow, and AI API integration. Seeking an internship to improve backend engineering skills and contribute to real software products.

PROJECT EXPERIENCE

- Coffee Shop Management System** 2026 – Present
WPF Desktop App + ASP.NET Core Payment API
Tech: C#, .NET 8, WPF, ASP.NET Core Web API, SQL Server, PayOS
 - Built a POS and management system for products, inventory, staff, customers, promotions, and revenue reports.
 - Developed QR payment API with PayOS/VietQR, layered backend architecture, SQL scripts, webhook handling, and HMAC-SHA256 verification.
- AI sentiment analysis - Love Sense AI** 2026 – Present
AI Sentiment Analysis Web App
Tech: Next.js, TypeScript, FastAPI, PostgreSQL, Firebase Auth, OpenAI API
 - Built an AI web app to analyze conversation sentiment, generate contextual response suggestions, and support screenshot text extraction via OCR / AI Vision.
 - Implemented authentication, user profile, conversation history, demo mode, database storage, and deployment.
- Coffee Shop Website** 2025
E-commerce Coffee Ordering Website
Tech: HTML, CSS, JavaScript, Bootstrap, Firebase, LocalStorage
 - Developed an ordering website with menu, cart, checkout, account management, branch information, loyalty points, and responsive UI.
 - Implemented Firebase Auth, cart options, discounts, QR banking support, and real-time price calculation.

ACHIEVEMENTS

- Database Design Challenge - HUIT, AY 2025-2026**
 - Encouragement Prize
- Student Research Competition - HUIT, AY 2025-2026**
 - Encouragement Prize – “Optimizing Time in Mining High Utility Itemsets on Positive and Negative Profit Transaction Databases”
- University-level Data Science Competition**
 - Final Round Participant – AI application tracks including Rice Pest Classification
 - Segmentation and Skin Cancer Classification

EDUCATION

- 2024 – Present
UNIVERSITY OF INDUSTRY
AND TRADE – HUIT
 - Major: Information Technology
 - GPA: 3,74/ 4.0

SKILLS

- Languages: C#, C++, JavaScript, SQL
- Backend: .NET, ASP.NET Core Web API, RESTful API
- Database: SQL Server, T-SQL
- Frontend: HTML/CSS, Bootstrap
- Desktop: WPF, MVVM Pattern
- Tools: Git, GitHub, Visual Studio, VS Code, Swagger/Postman

LANGUAGES

- English: Technical reading
